Subject: USPS Article 37.3.A.1 New Duty Assignment National Dispute-Clarification 2 of 2
Date: Wed, Apr 11, 2018 6:09 pm

Clarification two of two.

This is the second issue in the dispute, again reiterating the exception to not hold cases involving reversions, abolishments, and/or excessing in abeyance pending the national dispute.

Do NOT hold cases in abeyance that should not be held in abeyance.

You can separate without prejudice any unresolved new duty assignment issue at Step Three or at the arbitration hearing.

If the ONLY issue is the creation of new duty assignments under Article 37.3.A.1, then those cases should be held in abeyance at Step 3 or pending Arbitration.

No cases should be held in abeyance at Step Two.

Please share with your local/state APWU leadership.

Further guidance is forthcoming in the very near future. Please retain a copy of this e-mail thread for future reference.

In union solidarity, the struggle continues.

> However, it does not mean we can abolish and or revert jobs just because we're under the cap. Reversions and abolishment have to be justified due to business impacts, volume losses, operational windows changing, etc.. Each reversion or abolishment can be challenged, and if

the work is still being performed by other employees (PSEs) the union has a right to grieve that and use whatever data is available to show the reversion or abolishment was not justified.

Subject: RE: Dashboard Complement Staffing

Lamont,

In response to your inquiry:

The Postal Service is currently using two applications. The first is a Workforce Dashboard application that includes the following:

- On-rolls complement for Mail Processing, City Letter Carriers, and Retail and Customer Service Craft employees
- Actual vs. earned complement
- Recent position activity, such as job postings, conversions, positions reverted, and positions abolished
- Newly vacant craft positions

The second is a Job Bid Management application that includes the following:

- Daily display of vacant craft positions for Mail Processing, City Letter Carriers, and Retail and Customer Service Craft employees
- Earned complement data from the Workforce Dashboard for use when requesting bid postings
- Reversion module to assist in tracking the contractual requirements when reverting a vacant position

Neither of these applications includes any new staffing models or tools. They are simply a mechanism by which the field can access current data regarding staffing and/or complement. **The Postal Service has not changed how staffing or earned complement is determined**; therefore, usage of the applications has no impact on wages, hours, or working conditions of bargaining-unit employees. These are merely internal management tools aimed at providing readily available data and ensuring compliance with postal regulations and the collective bargaining agreements.
