SUBJECT	DATE	FILING NO.
Mail Processing Work Assignment Guidelines	2/16/79	399

I. INTRODUCTION

The enclosed "Mail Processing Work Assignment Guidelines," provide primary craft designations relative to the performance of specific mail processing work functions. Compliance with the principles contained therein is mandatory and applicable to the assignment of all categories of employees in the regular work force. These assignment guidelines are to be implemented at all postal installations which perform mail processing, in accordance with the implementation criteria outlined below and consistent with the terms of the 1978 National Agreement.

II. IMPLEMENTATION CRITERIA

A. Efficient and Effective Operation

All actions taken relative to implementation of these guidelines must be consistent with an efficient and effective operation. Consistent with this obligation, no postal installation shall declare employees excess, increase the number of employees and/or increase work hours solely as a result of this instruction.

B. Four (4) Hours Criteria

If there are four (4) or more hours of continuous work consisting of one or more work functions in one or more operations designated to the same primary craft, the performance of the work should be assigned to an employee of that primary craft.

C. Distribution Activities

Where the functions of obtaining empty equipment, obtaining unprocessed mail, loading ledges and sweeping are an integral part of the distribution function and cannot be efficiently separated, the entire operation will be assigned to the primary craft performing the distribution activity.

D. Changes in Duty Assignments

No employee's current duty assignment will be modified by removing functions designated to another primary craft until and unless such duty assignment becomes vacant through attrition. In addition, management may continue to revert or abolish positions no longer needed.

E. Assignment of New and/or Additional Work

Assignment of new or additional work, not previously existing in the installation, shall be made in accordance with the primary craft designations contained in this instruction.

III. IMPLEMENTATION PROCEDURES

A. Responsibilities

Sectional Center Managers will review mail processing operations in installations within their designated MSC areas. This review will include, at a minimum, an examination of the work being performed, current duty assignments and a determination concerning what actions will be necessary to comply with the "Mail Processing Work Assignment Guidelines."

B. Identification of Primary Craft

All post offices with mail processing operations will, based on the primary craft designations, identify:

1. full-time clerk or mail handler duty assignments which are assigned to the inappropriate craft.

2. full-time clerk or mail handler duty assignments which include both clerk and mail handler primary craft functions.

3. work functions performed by part-time flexible clerks and mail handlers.

C. Implementation Plan

Based upon the above identification, each sectional center manager will develop a detailed implementation plan which will contain at a minimum:

1. the number of full-time clerk and mail handler employees.

2. the number, by tour and duties, of full-time clerks and mail handlers:

   a. with 8 hour assignments in the inappropriate craft.

   b. whose duty assignments includes 4 or more (but less than 8) hours of work in the inappropriate craft.

3. the number of full-time clerk and mail handler vacancies as of January 26, 1979.

4. the number of full-time clerk and mail handler vacancies that are anticipated, by postal quarter, during PQ's III and IV, FY 1979, and FY 1980.

5. the number of clerk and mail handler part-time flexible employees.

6. the number of clerk and mail handler part-time flexible employees, by tour, duties and hours, performing primary craft functions designated to a different craft.

7. actions that will be taken to achieve immediate compliance, and those actions which will require phased implementation.

8. the estimated time frame (as may be necessary) for implementation, including quarterly estimates.

9. any current clerk or mail handler functions not covered in the "Mail Processing Work Assignment Guidelines."

D. Adherence

Each sectional center manager will insure that the following actions, when taken, are consistent with this instruction:

1. Review each vacant full-time clerk and mail handler duty assignment.

2. Establishment of new full-time duty assignments.

3. Accession of clerk and mail handler employees.

4. Scheduling and staffing studies.

E. Reporting Requirements

The management sectional center implementation plan will be forwarded by March 19, 1979, through the District Office to the Regional Director, Mail Processing, who will be responsible for approving the MSC's plan, insuring its timely and effective implementation, and for monitoring performance against the plan. At least once every six months, a designated regional coordinator will review each MSC to determine its progress relative to making proper clerk-mail handler work assignments. The first review cycle must be completed no later than September 1, 1979, with subsequent regional reviews of MSC performance occurring semi-annually thereafter.
