A Commitment to Diversity

The Postal Service is committed to fostering and achieving a work and learning environment that respects and values a diverse workforce. Valuing and managing diversity in the Postal Service means that we will build an inclusive environment that respects the uniqueness of every individual and encourages the contributions, experiences and perspectives of all people.

It is essential that our work and learning environments be free from discrimination and harassment on any basis.

In our classrooms, on the workroom floor, in casual conversation and in formal meetings, employees and faculty are asked to encourage an open learning environment that is supportive of everyone.

Course materials and lectures, classroom debates and casual conversation should always reflect the commitment to safety and freedom from discrimination, sexual harassment and harassment on any prohibited basis. Instructors and class participants are expected to support this commitment.

If you find course material that is presented in the classroom or in self-instructional format that does not follow these guidelines, please let an instructor know immediately.

If classroom discussions do not support these principles please point that out to the instructor as well.

Diversity is a source of strength for our organization. Diversity promotes innovation, creativity, productivity and growth, and enables a broadening of existing concepts.

The Postal Service's policy is to value the diversity of our employees, customers and suppliers, and to do what is right for our employees and the communities we serve, thereby ensuring a competitive advantage in the global marketplace.

Preface

The Sales and Services Associate, On-the-Job Training (OJT) course was designed to provide retail coaches with daily guidelines and resources to be used for a hands-on training approach. The retail coach is not restricted to the time allotted for each days activities, and should spend time with the trainee to ensure complete comprehension of daily retail transactions. This OJT is used to acquaint employees with their new positions, to acquire knowledge and skills related to changes in work processes, and to implement refresher training. Throughout the OJT experience, retail coaches should emphasize the use of GIST (Appendix A) principles. Retail coaches are encouraged to follow the guideline provided, and review the Trainee Daily OJT Checklist with the trainee at the end of each day.

The SSA on-the-job training is not to be performed on overtime. Any exceptions must be approved by the appropriate manager or supervisor.

Day One

Day One – Overview

For the purpose of this training, each day will be broken into one hour sections. Retail coaches should follow this guide to eliminate confusion for the trainee and provide trainee adequate time for questions with each transaction.

Hour 1

- Introduction
  - Facility orientation

Hour 2

- Trainee Daily OJT Checklist
- Trainee Daily OJT Checklist Resources

Hours 3 and 4

- Retail Equipment Functions and Overview
- POS ONE Front Office - eLearning

Hours 5 and 6

- Observation of Window Transactions
  - Retail Coach opens window covering all opening procedures
  - Retail Coach performs customer transactions
  - Retail coach performs closeout

Hours 7 and 8

- Assigning Cash or Fixed Credit
- Trainee Daily OJT Checklist Review

Day One – Hour 1

Introduction:

Greet and introduce yourself to the new associate (trainee).

Review administrative matters by showing location of/or identifying the following in the facility:

- Emergency exits and emergency procedures
- Emergency numbers
- Restrooms
- Locker area
- Lunch room/break room
- Smoking Areas and policy
- Information boards
- Dress code

Facility Orientation

Workroom floor

- Dispatch/Staging area
- Collection area
- Anonymous mail area
- Registry cage (if applicable)
- Nixie area
- Carrier hold mail location
- Parcel storage area
- Empty equipment storage area
- Supply room/area
- Safes/Vaults

Retail area

- PO Box section
- Caller/Dutch door
- Retail lobby (writing tables, forms holders, ReadyPost fixture, etc.)

- Cashwrap area (if applicable)
- Counterline
- Close-out area

  Note: If the SSA (trainee) is not being trained in the office of the bid assignment, emphasize that other offices may be set up differently.

Day One – Hour 2

Trainee Daily OJT Checklist

The retail coach and the trainee should find a quiet place in the office (away from the counterline area and workroom floor) to confer in private.

The retail coach will provide the trainee with the Trainee Daily OJT Checklist, and discuss its purpose and completion process.

The Trainee Daily OJT Checklist (Appendix B) is completed by the trainee each day to identify progress and areas in which the associate would like more on-the-job instruction or coaching. Encourage the trainee to indicate any tasks needing additional assistance from the retail coach.

Review the Trainee Daily OJT Checklist at the end of each day and address all questions and concerns the trainee may have. You must ensure that you revisit those tasks that have been identified by the trainee for additional coaching.

At the conclusion of the 40 hours of on-the-job instruction, ideally the trainee should have addressed each task on the Trainee Daily OJT Checklist.

Trainee Daily OJT Checklist Resources

The retail coach will be observing and assisting the trainee on a daily basis. The Trainee Daily OJT Checklist Resources (Appendix C) provides a collection of resources and links to information that directly corresponds to the Trainee Daily OJT Checklist topics. These resources can be accessed and used to enhance the OJT experience. Completion of the Trainee Daily OJT Checklist by the associate each day will provide areas of concentration for the retail coach. The information in the resources and links should be used to reinforce areas where the trainee or retail coach believes additional training is necessary. The Trainee Daily OJT Checklist Resources (Appendix C) should also be copied and provided to the trainee for future reference.

Day One – Hours 3 and 4

Retail Equipment Functions and Overview

The retail coach will address and explain each component of retail equipment in which they will receive their training. The retail coach will proceed to equipment (preferably back office) and explain each component of the system. Additionally, the retail coach must ensure the trainee understands the section concerning PVIs.

POS ONE Equipment

Point of Service (POS) is the retail workstation.

ONE indicates this is the first of its type. There are several specific features that will make POS ONE easier to use:

- A user-friendly keypad.
- An all-purpose scanning device for special service labels and product scanning.
- The cost of every postal product and service is built into it and allows ease in upgrading.
- A multi-purpose receipt printer, money order imprinter, and bank stamp imprinter for checks.
- Remote system monitoring, which allows network updates to the DMM, IMM, and Priority Mail Express network, and system updates.

  Note: For POS offices, a 6 hour eLearning course entitled POS ONE Front Office, Course Number: 4120166 will be required during OJT training.

Benefits of POS ONE include:

- Introduces a state-of-the-art system that is committed to customer service by supporting corporate voice of the employee, goals, and providing complete, consistent, and effective communication with retail clerks.
- Supports voice of the customer and voice of the business.
- Provides simple to use with an easy-to-read keypad and clerk display monitor.
- Provides quicker and more efficient customer service.

- Provides accurate and up-to-date information on all rates and services.
- Provides detailed sales order information, improving availability of stamps and other products.
- Provides easy ZIP code and ZIP+4 access.
- Provides up-to-date data on APO/FPO restrictions.
- Provides on-line help screens throughout the system.
- After the money is collected, prints all Money Orders, reducing the chance for errors.
- Decreases transaction time for Money Orders, and trust accounts.
- Contains the DMM and IMM.

POS ONE is more efficient due to its ability to add and upgrade system features. Because of built-in Postal rules, POS ONE will help reduce or even eliminate human errors. The customers' options are displayed on a screen allowing them to make quick comparisons of price and value. The system prints out forms that previously were completed manually.

Network

The POS ONE tallies each transaction and builds a data file. The data generated during the course of each transaction is stored to help track inventory and to generate reports. When an associate performs a close out, it automatically transfers the daily data to a central file. All levels of management are able to pull these files in the form of reports. Some of these reports identify customer purchasing patterns, transaction times, and assists with staffing and scheduling.

Components of the POS ONE system – Overview

Retail coach: Each component must be addressed if applicable.

Terminal/Central Processing Unit (CPU) – Terminal "brain" of the system where information is stored. The hard drive records and tracks the daily transactions, then transfers the information to the central controller terminal. The terminals should be kept powered on at all times to receive update information.

Monitor/Screen (review appropriate equipment piece)

Sales and Services Associate Display Monitor –is the primary way of communicating with the system. The monitor is adjustable to each person's height and line of vision. The height and angle is also adjustable.

Touch screen – is used to complete transactions. The screen is activated by the touch of a finger. Please remember that pens, pencils or other pointed objects should never be used instead of a finger. The screen only requires a light touch.

Number pad – is part of the keypad on the sales and services associate display monitor. The number pad provides a convenient way to enter numeric information (for example, ZIP codes) faster than is possible with the keyboard. Notice the two keys on the keypad on the sales and services associate display monitor. These are scroll keys. The right scroll key is used to access the edit mode.

Static keys – are located on the keypad. Static keys provide a gateway to the major functions that are routinely handled. Static keys remain constant from screen to screen and from function to function.

Dyna Keys – are keys located on the right side of the screen and are identified with different options. These labels are associated with the physical keys that are immediately to the right of the screen. They're called "dyna" keys because they're Dynamic. They change, depending on where the associate is in a given transaction.

Barcode scanner – The scanner is a presentation scanner. Either present the barcode to the scanner or if the item is awkward or heavy, present the scanner to the barcode. The light must cross the entire barcode to read it correctly. The device also captures the date and time of each scan.

CAUTION:

THE SCANNER GENERATES A LOW-LEVEL LASER LIGHT THAT IS HARMLESS TO YOU AND YOUR EYES. NEVER ATTEMPT TO MODIFY THE SCANNER.

Receipt/Slip Printer – the POS ONE printer has several different functions, including printing receipts, processing checks and money orders and printing on forms. The printer actually contains two printers.

The receipt printer at the top of the printer prints the customer receipt and reports which are printed on thermal paper. There is no ribbon in the receipt printer, it uses heat to print on the receipt paper.

The lower section of the printer uses a special ink to print onto Money Orders, forms and checks. Forms being printed by this printer are inserted into the slot midway down the front of the printer. The system will prompt the associate to insert these items into the printer.

The printer can read the MICR-encoded, preprinted customer account number on the bottom of a check and serial numbers on money order. "MICR" stands for magnetic ink character recognition.

Scale – is used to weigh customer packages and letters. The digital display on the clerk display monitor shows the item weight in pounds and ounces. The scale shows weights as little as a tenth of an ounce and can handle up to 70 pounds. Objects should not be left on the scale when it is not being used as this will cause the scale to lose calibration. Notice the template on top of the scale. This ready reference helps the associate make decisions regarding surcharges, postcard sizes, flat vs. letter sizes, etc. when rating mail.

PVI unit – generates labels with postage imprinted.

Cash drawer/till – is used to store cash and other tender. The drawer will open electronically at the end of appropriate transactions. The system keeps track of every time the drawer opens. It is mandatory to use the POS ONE cash drawer.

Customer display unit – faces the customer and displays information about transactions in progress.

Keyboard – this is a standard computer keyboard. There is a small touch pad on the lower right side of the keyboard. This can be used to move the cursor, in a manner similar to a mouse.

Uninterruptible Power Supply (UPS) – the UPS has a battery that allows the associate to complete **immediate** customer transactions and shut down the system without losing any data in the event of a power failure. The system should always be plugged into the UPS box.

Laser printer – It will be used for report printing and other procedures.

Hardware Maintenance

There are a few things that the associates will be asked perform to help keep the equipment clean and running properly. It is extremely important never to use water or cleaner directly on any piece of equipment.

The display units may become dirty or smudged. Lightly spray a soft rag with water and wipe the screens. The associate may be required to turn off the screen prior to cleaning.

Occasionally the equipment will also need to be cleaned. The best way is to lightly spray a soft clean rag with non-abrasive cleaner and gently wipe off the equipment.

When the receipt printer is out of paper, the "paper out" light will turn red and will need a new roll of paper. The printer uses a thermal paper roll so it is important to load the roll in the correct direction.

Safety Practices and Procedures

As with all jobs and all equipment, safety, is the responsibility of every individual in the US Postal Service. The supervisor is responsible for instructing personnel in safety practices applicable to the operation of the equipment. In the same manner, it is the responsibility of each individual operating the equipment to understand and observe the safety standards and procedures established by the US Postal Service. The operation of electronic and electrical equipment has several elements of danger. Carelessness can result in injury. Please observe the following precautions:

- Do not operate equipment without proper authority.
- Follow all safety precautions.
- Do not operate unsafe or defective equipment.
- Avoid unsafe act and conditions.
- Practice good housekeeping.
- Do not engage in horseplay.
- Immediately report all hazardous conditions and operations to the supervisor.
- Keep mentally and physically alert.
- Know the location of the main power shutdown devices.
- Always turn the power off when doing any replacement or repair of components.
- Do not operate the POS ONE without properly installed covers. (i.e. without scales platform).
- Check the power plug before plugging it in. Always use a power cord that is in good condition. A power cord that is frayed or has broken insulation is a shock hazard.
- To avoid the danger of electrical shock, make sure the power plug is inserted into a properly wired receptacle.
- Never place food or liquids on or around any part of the equipment.
- Keep clothing, hands and feet dry.
- Avoid the use of toxic or flammable solvents for cleaning purposes. If there are certain jobs specifically requiring the use of these solvents protective gear must be worn.

- In the event of a fire, use a type C, BC or ABC extinguisher only. Do not use water or any other liquid stream extinguisher, as either presents a shock hazard to the user and will cause considerable damage to electrical equipment.
- Know how to get medical aid.

Following safety procedures can save associates from injury and will prevent lost time for the retail associate and the Postal Service.

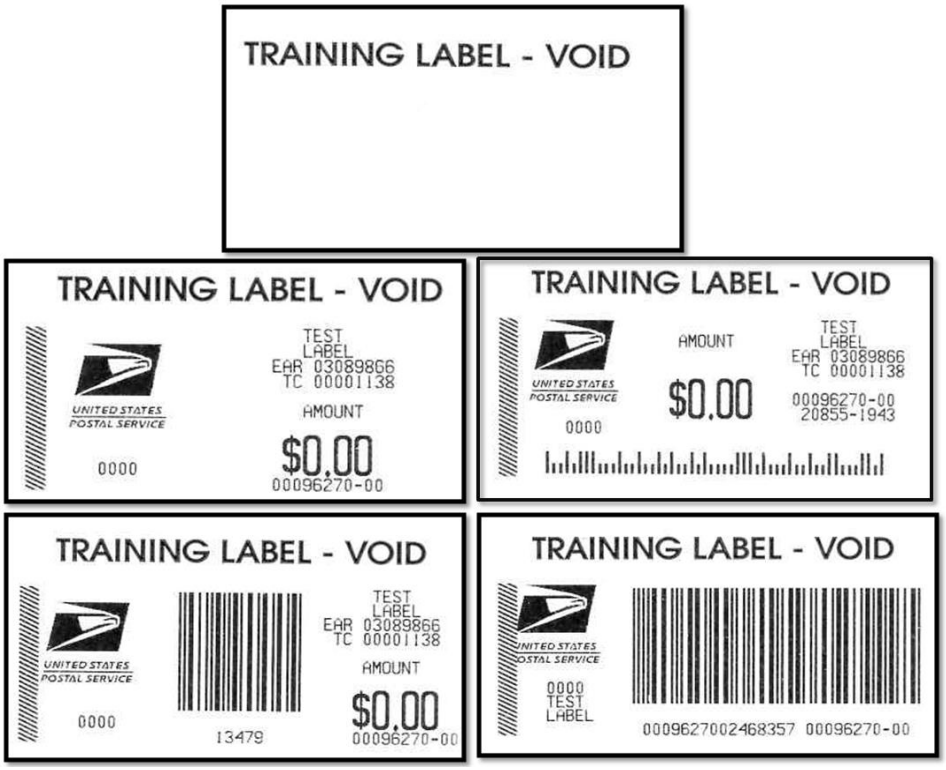

Logging on to POS ONE System

The sign-in procedure provides one of the most valuable features of the POS ONE system – security. Each associate will have a unique, computer-generated user identification code, referred to as a logon ID.

Along with an ID the associate will have a unique password that they choose, and that no one else knows. The system knows what password corresponds with their ID, nothing else will unlock the system. While the logon ID remains the same all the time, each associate controls their password and it can be changed, as needed.

Test Label

Four formats. Obtained by selecting “LABEL” with mode button and pressing paper feed button. Run at start of tour, after clearing a jam and after loading blank labels. A total of five labels are dispensed, one is blank. These labels are NOT to be given away.

PVI Label

No barcode. Provided automatically for non-POSTNET flats, Priority Mail Express , and International mail.

These labels must not be used instead of the proper PVI labels – always use correct workflow to avoid misuse.

Note: A separate barcode label is printed for International Mail.

Domestic Express Mail

International Express Mail

PVI Barcode Label

5-digit ZIP barcode: Affix to domestic parcels, Small parcels and Rolls (SPRs), and Irregular Parcels and Pieces (IPP). These labels are also acceptable on letters.

First-Class Mail Parcel

Parcel Post Parcel

PVI Label ALPHA-F

Affix to all domestic First-Class Mail flats.

Destination ZIP Label ALPHA-Z

5-digit ZIP barcode label with no postage value: These labels must be used for domestic parcels and SPRs (Small Parcels and Rolls/IPP) that are presented for mailing with postage already affixed.

First-Class Mail parcel with postage affixed

Parcel Post parcel with postage affixed

First-Class Mail parcel with Extra Service (Delivery Confirmation)

Destination Label ALPHA-F/ALPHA-Z

These labels may be used for flats with postage already affixed which are NOT sent Priority Mail Express , Registered Mail, or Certified Mail (Affix no label on these flats).

Note: Used for a Flat with no postage required.

Run Test Labels

To generate test labels:

1. Press “MODE” button until label appears on PVI display.
2. Press “PAPER FEED” button once.

This will cause the PVI to eject a blank label, and print the four test labels.

Manual Retail Equipment

Basic Scale – is used to weigh customer packages and letters. The scale shows weights as little as a tenth of an ounce and can handle up to 70 pounds. Objects should not be left on the scale when it is not being used as this will cause the scale to lose calibration.

Use Notice 3-S, the *Shape Based Pricing Template,* to help make decisions regarding surcharges, postcard sizes, flat vs. letter sizes, etc. when rating mail.

Once the SSA has determined the weight of the item, use the Zone Chart to determine which zone the item is being mailed to. You can find a printable version of the current Zone Chart at this link: http://postcalc.usps.gov/Zonecharts/

When the SSA has established the weight of the item and what zone it is going to, then they will refer to Notice 123 for the price. Price List, Notice 123 is available at this link: http://pe/text/dmm300/Notice123.htm

Price List, Notice 123 lists the shipping prices for each mail class by weight and zone. It also lists the prices of Extra Services such as USPS Tracking .

Smart Scale - The smart scale will allow the SSA to select the mail class and Extra Services for the item, and will show the shipping cost for the selections. It will also allow the SSA to choose the type of item – flat, letter, package, if applicable to the mail class. For example, Priority Mail offers the selection of Flat Rate Envelope as well as Flat Rate Box.

Postage Meter - Generates labels with postage imprinted. The postage meter will allow the SSA to print a postage label for the item being mailed.

IMD Scanner - A hand-held device that the sales and services associate will use to perform the required scans on items being delivered to customers, and when accepting pre-paid items for mailing.

Paymaster Money Order Imprinter - used to print Money Orders.

Hardware Maintenance

There are a few things that the associates will be asked perform to help keep the equipment clean and running properly. It is extremely important never to use water or cleaner directly on any piece of equipment.

Occasionally the equipment will also need to be cleaned. The best way is to lightly spray a soft clean rag with non-abrasive cleaner and gently wipe off the equipment.

Safety practices and procedures

As with all jobs and all equipment, safety is the responsibility of every individual in the US Postal Service. The supervisor is responsible for instructing personnel in safety practices applicable to the operation of the equipment.

In the same manner, it is the responsibility of each individual operating the equipment to understand and observe the safety standards and procedures established by the US Postal Service. The operation of electronic and electrical equipment has several elements of danger. Carelessness can result in injury.

Please observe the following precautions:

- Do not operate equipment without proper authority.
- Follow all safety precautions.

- Do not operate unsafe or defective equipment.
- Avoid unsafe act and conditions.
- Practice good housekeeping.
- Do not engage in horseplay.
- Immediately report all hazardous conditions and operations to the supervisor.
- Keep mentally and physically alert.
- Know the location of the main power shutdown devices.
- Always turn the power off when doing any replacement or repair of components.
- Check the power plug before plugging it in. Always use a power cord that is in good condition. A power cord that is frayed or has broken insulation is a shock hazard.
- To avoid the danger of electrical shock, make sure the power plug is inserted into a properly wired receptacle.
- Never place food or liquids on or around any part of the equipment.
- Keep clothing, hands and feet dry.
- Avoid the use of toxic or flammable solvents for cleaning purposes. If there are certain jobs specifically requiring the use of these solvents protective gear must be worn.
- In the event of a fire, use a type C, BC or ABC extinguisher only. Do not use water or any other liquid stream extinguisher, as either presents a shock hazard to the user and will cause considerable damage to electrical equipment.
- Know how to get medical aid.

Following safety procedures can save associates from injury and will prevent lost time for the retail associate and the Postal Service.

POS ONE Front Office eLearning

For POS offices, the POS ONE Front Office eLearning course # 4120166 is included in the OJT portion of the Sales and Services Associate training to provide additional practice in successfully completing daily transactions.

For Day One, the trainee should be provided time to complete the following course lessons:

- Lesson 1: Overview of the POS ONE System
- Lesson 2: Getting Started with POS ONE
- Lesson 3: Selling Stamps and Merchandise

The retail coach should have the flexibility to have the trainee complete the three lessons in one session, or in segments to create the most beneficial OTJ experience.

For example, if there are particular times when customer traffic may be slow, the retail coach may capitalize on this opportunity to have the trainee complete an eLearning lesson. This would allow the trainee to observe the retail coach at times when retail transactions are more frequent.

Day One – Hours 5 and 6

The purpose of hours 5 and 6 is to provide the trainee an opportunity to observe transactions at the counter line.

The trainee will not perform any of the transactions. The trainee will be provided with a step by step explanation of each transaction. The trainee will primarily focus their attention on the retail coach.

The retail coach accompanies the new sales and services associate (SSA) trainee to the front counter. The trainee will observe window transactions conducted by retail coach.

The retail coach will now explain and demonstrate the open/start of the day procedures with the trainee.

The retail coach should be certain to have the trainee observe them reading the daily messages and note any changes that are necessary for your operation.

Retail coach will have the trainee observe them retrieve their postage stock and cash drawer. Place the cash drawer and stock into designated, secured, and proper drawers for daily transactions.

The retail coach is now ready to assist customers.

The retail coach will explain to the trainee, while performing each and every transaction, forms required, proper placement of PVI, and identifying the class of service used (i.e. First-Class Mail, insurance, return receipts, etc.). Also, retail coach continues identifying the appropriate keys used on system and covering all HAZMAT questions and the GIST program points.

The retail coach must be certain to reinforce the practice of giving each and every customer their receipts at the end of each transaction.

Each time the retail coach leaves their station, they must be certain to secure their stock and cash drawer. When the retail coach leaves their station they should explain to the trainee the appropriate key that should be pushed to account for the time away from the window.

The retail coach will emphasize advance deposits must be remitted before excessive cash/checks build up in their cash drawer.

After **approximately** 2 hours of transactions, retail coach closes window, and begins covering all closing procedures.

- Print all appropriate reports that need to be verified
- Verify receipts
- Correlate receipts with reports
- Cash retained
- Retail coach with trainee will now take cash, checks, and all documents to back office for verification
- Upon completion of verification process, verifier will acknowledge preliminary 1412 accuracy and inform the retail coach they may now print their Final 1412
- Retail coach will now print their Final 1412
- Retail coach will now secure their cash drawer and place postage stock in designated secure area

Day One – Hours 7 and 8

Assigning Cash or Fixed Credit

After observing the retail coach interact with customers and perform transactions, it is now time for to set up the trainee to work the window and take their first steps operating the retail equipment.

The retail coach will describe and demonstrate how to obtain, store, and count fixed credits. Retail coach will demonstrate the procedures for setting up a cash drawer. The retail coach will reinforce the guidelines regarding accountability of Postal funds and accountable paper, and how to maintain them in a neat and orderly fashion.

In an office with individual accountability, the retail coach will provide the trainee with a PS Form 17, Stamp Requisition Form, and guide the trainee in its completion so they may order and verify the stamp stock issued.

Supervisor will issue a fixed/cash credit and money orders/stock to the trainee so the trainee will be able to perform duties on the window.

The retail coach will observe the trainee in logging onto the system. The trainee will use the log on ID provided by the supervisor. The trainee will need to change or establish their password.

The retail coach will assist the trainee with completion of:

- PS Form 3977, Duplicate Key, *Combination, Password Envelope*
- PS Form 3369, *Consigned Credit Receipt*

The trainee will perform NO transactions on the first day. The trainee once signed on will perform a close out for the day.

Trainee Daily OJT Checklist Review

The trainee should be given adequate time to complete the Trainee Daily OJT Checklist in a quiet place, away from the retail window and other distractions. The retail coach and the trainee will review and discuss the Trainee Daily OJT Checklist in private to confirm and reinforce practiced skills, and plan for continued development for the remainder of the OJT. The retail coach should use positive reinforcement to promote a learning environment where the trainee is comfortable and demonstrates proficiency.

Day Two

Day Two – Overview

For the purpose of this training, each day will be broken into one hour sections. The retail coach should follow this to eliminate confusion for the student and provide trainee adequate time for questions with each transaction.

Hour 1

Previous day review

Hours 2 through 7

- Window Transactions (Retail Coach observes and assists):
  - Trainee opens window covering all opening procedures
  - Trainee performs customer transactions
  - Trainee performs closeout
- POS ONE Front Office - eLearning

Hour 8

- Close-out
- Trainee Daily OJT Checklist Review

Day Two

Hour 1

The retail coach will begin day two with a question and answer session with the trainee using the Trainee Daily OJT Checklist. This will allow the retail coach to monitor and work with the trainee on any products and services in which they may need further instruction or clarification.

Hours 2 through 7

Window Transactions

Trainee will now begin the open/start of day procedures while the retail coach observes. Retail coach should be certain to observe while the trainee signs on the system with their password, and reads any/all daily messages that appear.

Trainee will retrieve their cash drawer – placing it and any accountable items into properly designated areas (i.e. POS ONE cash drawer). Trainee will be ready to assist the customers.

The retail coach must remain with the trainee while they are working on the window during the On-the-Job Training phase. Under no circumstances is a retail coach permitted to allow the trainee to perform transactions on their own.

The retail coach must observe the trainee performing transactions and ensuring that all necessary forms are completed and attached in the proper location to articles before they are placed into containers for dispatch. Retail coach will guide the trainee in using the proper workflow (no shortcuts), GIST, asking the HAZMAT questions, pressing the proper keys on retail equipment, and ensuring each and every customer receives a receipt.

Each and every customer must be given a receipt at the end of each transaction. Under no circumstances is the trainee to ask the customer if they need a receipt.

Each time the trainee leaves their workstation (for any reason), the retail coach must be certain to instruct the trainee to secure their cash drawer and accountable items. If the trainee leaves their workstation for any reason, the retail coach must inform them to use the appropriate key on their system to account for time away from the window area.

The retail coach will emphasize advance deposits must be remitted before excessive cash/checks accumulate in their cash drawer.

POS ONE Front Office eLearning

For POS offices, the POS ONE Front Office eLearning course # 4120166 is included in the OJT portion of the Sales and Services Associate training to provide additional practice in successfully completing daily transactions. For Day Two, the trainee should be provided time to complete the following course lessons:

- Lesson 4: Performing Domestic Mail Transactions
- Lesson 5: Performing International Mail Transactions
- Lesson 6: Completing Money Order Transactions
- Lesson 7: Completing PO Box Transactions

The retail coach should have the flexibility to have the trainee complete the four lessons in one session, or in segments to create the most beneficial OTJ experience.

For example, if there are particular times when customer traffic may be slow, the retail coach may capitalize on this opportunity to have the trainee complete an eLearning lesson. This would allow the trainee to observe the retail coach at times when retail transactions are more frequent.

Hour 8

Close Out

After daily transactions are completed, the trainee will begin the closeout procedures for the day using the following items:

- Print all appropriate reports that need to be verified, including Preliminary 1412
- Verify receipts
- Correlate receipts with reports
- Cash, Checks and supporting documentation to be taken to be verified in back office
- After verification process is completed by the designated close-out personnel, the trainee should be instructed to run their Final 1412
- Trainee should print and sign their Final 1412 and resubmit it to the designated close-out personnel
- Retail coach observes and properly instructs the trainee in securing their cash drawer, and accountable items

Trainee Daily OJT Checklist Review

The trainee should be given adequate time to complete the Trainee Daily OJT Checklist in a quiet place, away from the retail window and other distractions.

The retail coach and the trainee will review and discuss the Trainee Daily OJT Checklist in private to confirm and reinforce practiced skills, and plan for continued development for the remainder of the OJT. The retail coach should use positive reinforcement to promote a learning environment where the trainee is comfortable and demonstrates proficiency.

Day Three

Day Three – Overview

For the purpose of this training, each day will be broken into one hour sections. The retail coach should follow this to eliminate confusion for the student and provide trainee adequate time for questions with each transaction.

Hour 1

Previous day review

Hours 2 through 7

- Window Transactions (Retail coach observes and assists):
  - Trainee opens window covering all opening procedures
  - Trainee performs customer transactions
  - Trainee performs closeout
- POS ONE Front Office - eLearning

Hour 8

- Close-out
- Trainee Daily OJT Checklist Review

Day Three

Hour 1

The retail coach will begin day three with a question and answer session with the trainee using the Trainee Daily OJT Checklist. This will allow the retail coach to monitor and work with the trainee on any products and services in which they may need further instruction or clarification.

Hours 2 through 7

Window Transactions

Trainee will now begin the open/start of day procedures while the retail coach observes. Retail coach should be certain to observe while the trainee signs on the system with their password, and reads any/all daily messages that appear.

The trainee will retrieve their cash drawer – placing it and any accountable items into properly designated areas (i.e. POS ONE cash drawer). Trainee will be ready to assist the customers.

The retail coach must remain with the trainee while they are working on the window during the On-the-Job Training phase. Under no circumstances is a retail coach permitted to allow the trainee to perform transactions on their own.

The retail coach must observe the trainee performing transactions and ensuring that all necessary forms are completed and attached in the proper location to articles before they are placed into containers for dispatch. Retail coach will guide the trainee in using the proper workflow (no shortcuts), GIST, asking the HAZMAT questions, pressing the proper keys on retail equipment, and ensuring each and every customer receives a receipt.

Each and every customer must be given a receipt at the end of each transaction. Under no circumstances is the trainee to ask the customer if they need a receipt.

Each time the trainee leaves their workstation (for any reason), the retail coach must be certain to instruct the trainee to secure their cash drawer and accountable items. If the trainee leaves their workstation for any reason, the retail coach must inform them to use the appropriate key on their system to account for time away from the window area.

The retail coach will emphasize advance deposits must be remitted before excessive cash/checks accumulate in their cash drawer.

POS ONE Front Office eLearning

For POS offices, the POS ONE Front Office eLearning course # 4120166 is included in the OJT portion of the Sales and Services Associate training to provide additional practice in successfully completing daily transactions. For Day Three, the trainee should be provided time to complete the following course lessons:

- Lesson 8: Using Trust Accounts to Process Transactions
- Lesson 9: Completing Customer Service Options
- Lesson 10: Exchanging and Voiding Transactions
- Lesson 11: Performing Clerk Services
- Lesson 12: Performing End-of-Day Responsibilities

The retail coach should have the flexibility to have the trainee complete the five lessons in one session, or in segments to create the most beneficial OTJ experience. For example, if there are particular times when customer traffic may be slow, the retail coach may capitalize on this opportunity to have the trainee complete an eLearning lesson. This would allow the trainee to observe the retail coach at times when retail transactions are more frequent.

Hour 8

Close Out

After daily transactions are completed, the trainee will begin the closeout procedures for the day using the following items:

- Print all appropriate reports that need to be verified, including Preliminary 1412
- Verify receipts
- Correlate receipts with reports
- Cash, Checks and supporting documentation to be taken to be verified in back office
- After verification process is completed by the designated close-out personnel, the trainee should be instructed to run their Final 1412
- Trainee should print and sign their Final 1412 and resubmit it to the designated close-out personnel
- Retail coach observes and properly instructs the trainee in securing their cash drawer, and accountable items

Trainee Daily OJT Checklist Review

The trainee should be given adequate time to complete the Trainee Daily OJT Checklist in a quiet place, away from the retail window and other distractions.

The retail coach and the trainee will review and discuss the Trainee Daily OJT Checklist in private to confirm and reinforce practiced skills, and plan for continued development for the remainder of the OJT. The retail coach should use positive reinforcement to promote a learning environment where the trainee is comfortable and demonstrates proficiency.

Day Four

Day Four – Overview

For the purpose of this training, each day will be broken into one hour sections. The retail coach should follow this to eliminate confusion for the student and provide trainee adequate time for questions with each transaction.

Hour 1

Previous day review

Hours 2 through 7

- Window Transactions (Retail coach observes and assists):
  - Trainee opens window covering all opening procedures
  - Trainee performs customer transactions
  - Trainee performs closeout

Hour 8

- Close-out
- Trainee Daily OJT Checklist Review

Day Four

Hour 1

The retail coach will begin day four with a question and answer session with the trainee using the Trainee Daily OJT Checklist. This will allow the retail coach to monitor and work with the trainee on any products and services in which they may need further instruction or clarification.

Hours 2 through 7

Window Transactions

Trainee will now begin the open/start of day procedures while the retail coach observes. Retail coach should be certain to observe while the trainee signs on the system with their password, and reads any/all daily messages that appear.

The trainee will retrieve their cash drawer – placing it and any accountable items into properly designated areas (i.e. POS ONE cash drawer). Trainee will be ready to assist the customers.

The retail coach must remain with the trainee while they are working on the window during the On-the-Job Training phase. Under no circumstances is a retail coach permitted to allow the trainee to perform transactions on their own.

The retail coach must observe the trainee performing transactions and ensuring that all necessary forms are completed and attached in the proper location to articles before they are placed into containers for dispatch. Retail coach will guide the trainee in using the proper workflow (no shortcuts), GIST, asking the HAZMAT questions, pressing the proper keys on retail equipment, and ensuring each and every customer receives a receipt.

Each and every customer must be given a receipt at the end of each transaction. Under no circumstances is the trainee to ask the customer if they need a receipt.

Each time the trainee leaves their workstation (for any reason), the retail coach must be certain to instruct the trainee to secure their cash drawer and accountable items. If the trainee leaves their workstation for any reason, the retail coach must inform them to use the appropriate key on their system to account for time away from the window area.

The retail coach will emphasize advance deposits must be remitted before excessive cash/checks accumulate in their cash drawer.

Hour 8

Close Out

After daily transactions are completed, the trainee will begin the closeout procedures for the day using the following items:

- Print all appropriate reports that need to be verified, including Preliminary 1412
- Verify receipts
- Correlate receipts with reports
- Cash, Checks and supporting documentation to be taken to be verified in back office
- After verification process is completed by the designated close-out personnel, the trainee should be instructed to run their Final 1412
- Trainee should print and sign their Final 1412 and resubmit it to the designated close-out personnel
- Retail coach observes and properly instructs the trainee in securing their cash drawer, and accountable items

Trainee Daily OJT Checklist Review

The trainee should be given adequate time to complete the Trainee Daily OJT Checklist in a quiet place, away from the retail window and other distractions. The retail coach and the trainee will review and discuss the Trainee Daily OJT Checklist in private to confirm and reinforce practiced skills, and plan for continued development for the remainder of the OJT. The retail coach should use positive reinforcement to promote a learning environment where the trainee is comfortable and demonstrates proficiency.

Day Five

Day Five – Overview

For the purpose of this training, each day will be broken into one hour sections. The retail coach should follow this to eliminate confusion for the student and provide trainee adequate time for questions with each transaction.

Hour 1

Previous day review

Hours 2 through 7

- Window Transactions (Retail coach observes and assists):
  - Trainee opens window covering all opening procedures
  - Trainee performs customer transactions
  - Trainee performs closeout

Hour 8

- Close-out
- Trainee Daily OJT Checklist Review

Day Five

Hour 1

The retail coach will begin day five with a question and answer session with the trainee using the Trainee Daily OJT Checklist. This will allow the retail coach to monitor and work with the trainee on any products and services in which they may need further instruction or clarification.

Hours 2 through 7

Window Transactions

The trainee will now begin the open/start of day procedures while the retail coach observes. The retail coach should be certain to observe while the trainee signs on the system with their password, and reads any/all daily messages that appear.

Trainee will retrieve their cash drawer – placing it and any accountable items into properly designated areas (i.e. POS ONE cash drawer). Trainee will be ready to assist the customers.

The retail coach must remain with the trainee while they are working on the window during the On-the-Job Training phase. Under no circumstances is a retail coach permitted to allow the trainee to perform transactions on their own.

The retail coach must observe the trainee performing transactions and ensuring that all necessary forms are completed and attached in the proper location to articles before they are placed into containers for dispatch. Retail coach will guide the trainee in using the proper workflow (no shortcuts), GIST, asking the HAZMAT questions, pressing the proper keys on retail equipment, and ensuring each and every customer receives a receipt.

Each and every customer must be given a receipt at the end of each transaction. Under no circumstances is the trainee to ask the customer if they need a receipt.

Each time the trainee leaves their workstation (for any reason), the retail coach must be certain to instruct the trainee to secure their cash drawer and accountable items. If the trainee leaves their workstation for any reason, the retail coach must inform them to use the appropriate key on their system to account for time away from the window area.

The retail coach will emphasize advance deposits must be remitted before excessive cash/checks accumulate in their cash drawer.

Hour 8

Close Out

After daily transactions are completed, the trainee will begin the closeout procedures for the day using the following items:

- Print all appropriate reports that need to be verified, including Preliminary 1412
- Verify receipts
- Correlate receipts with reports
- Cash, Checks and supporting documentation to be taken to be verified in back office
- After verification process is completed by the designated close-out personnel, the trainee should be instructed to run their Final 1412
- Trainee should print and sign their Final 1412 and resubmit it to the designated close-out personnel
- Retail coach observes and properly instructs the trainee in securing their cash drawer, and accountable items

Trainee Daily OJT Checklist Review

The trainee should be given adequate time to complete the Trainee Daily OJT Checklist in a quiet place, away from the retail window and other distractions. The retail coach and the trainee will review and discuss the Trainee Daily OJT Checklist in private to confirm and reinforce practiced skills, and plan for continued development for the remainder of the OJT. The retail coach should use positive reinforcement to promote a learning environment where the trainee is comfortable and demonstrates proficiency.

Upon completion of the OJT, the retail coach will provide the future associate with a copy of the Trainee Daily OJT Checklist. The retail coach should also provide a copy of the Trainee Daily OJT Checklist Resources for the associate to reference when they are in their assigned unit.

Appendix

Appendix A

Using GIST

The customer's experience can be enhanced at the retail counter by practicing the basic (Greet, Inquire, Suggest and Thank) principles. By remembering to use the GIST principles, you can "Engage our Customers" each time, every day.

"G" – Greeting Customers

Have you ever noticed that greeting your customer sets the tone for the entire transaction? A pleasant greeting and eye contact encourage open communication with your customer. Greet your customer by name, if you know it. Being attentive throughout the entire transaction tells your customers that they are important and that you value their business. A SSA in complete uniform also communicates trust in your ability to provide reliable service in a professional manner.

"I" – Inquiring

Customers' needs change every day. By inquiring, we engage our customer to better understand their mailing needs. What they needed yesterday, may not be the same as what they need today. We have a variety of products and services which are not easily understood by many of our customers. Ask questions, for example, "would you like to purchase insurance to give you peace of mind in case your package is lost or damaged?" It is important to communicate with each customer and to listen carefully to what they say.

"S" – Suggesting

It is the SSA's responsibility to suggest options that would best meet your customers' mailing needs. Suggesting and promoting our premier products and services is one of the best ways to ensure customer satisfaction while offering excellent value. Suggesting Extra Services such as USPS Tracking and Insurance adds value by providing customers with peace of mind since customers will know when their packages arrive and that they are insured against damage or loss. Suggesting additional products or services adds value by saving customers an unnecessary extra trip to the post office. Remember - customers rely on you, the retail expert, to

suggest products and services, and to explain their features and benefits.

"T" – Thanking

When we were children, we learned the importance of saying "thank you." Have you ever been in a retail establishment when you weren't thanked when the transaction was completed? Did you feel unappreciated? Did you feel like going back? It is important that our customers know how much we appreciate their business. Satisfied customers are repeat customers who we can "thank" for paying our salaries. Always end the transaction in a pleasant manner by saying "Thank you" or "Thank you for choosing the US Postal Service" and always provide customers with their receipt.

Appendix B

Trainee Daily OJT Checklist

1. Check all completed items each day.
2. Indicate any tasks needing additional assistance from the retail coach in the additional assistance column.

Appendix C

Trainee Daily OJT Checklist Resources

Customer Experience Essential Videos

A positive customer experience starts with four basic principles, which have been identified as "customer experience essentials."

Telephone Courtesy

The customer's experience with you on the telephone matters. Make sure to do the following:

- **Answer:** Promptly, within three rings, and with courtesy.
- **Greet:** "Thank you for calling the United States Postal Service."
- **Identify:** Your office name and your name.
- **Offer Assistance:** Get the customer's number (in case the call is disconnected); identify the issue; answer the question if you know the answer; if not, document the inquiry on the Customer Complaint Control Log; establish a time you will contact the customer again and follow up with the accurate information. Assume ownership of your customer. Do not transfer calls if possible.
- **Thank the Customer:** "Thank you for using the United States Postal Service. We appreciate your business."

Deliver a positive customer experience every time!

To watch the video, go to:
http://56.88.100.141/ipchecker/odrouter.asp?v=TelephoneCourtesyOC.wmv

It begins with a smile

Studies have shown that customers remember the first and last moments of their interaction more than anything else that happens in the middle. This means you play a key role to the success of any interaction with our customers the way you greet and thank each of them.

The "It begins with a smile" means to begin every customer interaction in a friendly and courteous manner to let the customer know we want to help.

Our customers today have more choices, are more informed, and expect excellent service. So it's more important than ever for us to be professional, friendly, and courteous. We need to ensure we are satisfying our customers' needs so they keep coming back again — and again.

Providing friendly and courteous service is another way that we deliver to our customers — a positive customer experience.

To watch the video, go to:
http://56.88.100.141/ipchecker/odrouter.asp?v=DeliveryDoneRight.wmv

Delivery Done Right

Delivery Done Right emphasizes that all employees are responsible for delivering the mail safely and accurately — and making sure it's scanned when appropriate. Customers expect the Postal Service will deliver mail correctly, with proper delivery attempts for parcels or mailpieces requiring signatures. And, they expect to be able to track mail as it's scanned during processing.

When delivery is done right, customers have confidence in us and their overall customer experience is a positive one.

To watch the video, go to:
http://56.88.100.141/ipchecker/odrouter.asp?v=DeliveryDoneRight.wmv

We Value Your Business

The fourth "Essential", We Value Your Business, focuses on the customer's "Sending" Experience and our small business customers. Small business customers need accurate information about our products, services, and regulations.

We must be ready to provide accurate information whenever possible. If customers need additional help, refer them to the special small business toll-free help line where they can talk to professionals who are specially trained in our small business products and services. That number is 1-USPS-4-SMBIZ (1-877-747-6249).

We want to make every customer experience a positive one to enable a culture of responsiveness that will result in customer loyalty and retention.
